

CALIFORNIA'S ELECTION DATA IN 2012

30/03/2023
Oluwaseun Ipede

Project Summary.

I work in the field of electoral politics, and specifically interested in ballot measures, where citizens vote directly to enact new laws.

I'm a GIS analyst for a nongovernmental organization that supported California's 2012 ballot measure that would have required labeling of genetically modified organisms (GMOs) in food.

My task is to look at the broad voting patterns in California on this issue, knowing that the initiative did not gain enough votes to pass.

The colors shows the number of voters across the state that supported the law.

Normalized (YES voter to Total votes)

- 0.25 - 0.305
- 0.305 - 0.383
- 0.383 - 0.449
- 0.449 - 0.529
- 0.529 - 0.639
